

Are you breastfeeding or pumping in Maine?

Is your baby 3 months old
or younger?

You may be able to help us learn
about PFAS in human milk!

If you participate in this research study:

- You will be asked to complete two 10-minute surveys
- You will be asked to send us a sample of your breastmilk

You can choose to get the PFAS test results from
your breastmilk.

Call or text 731-859-2166 or email
pfasbreastfeedingstudy@gmail.com for details
on how to participate.
